Proposed New IUPAP Prizes

It is proposed that IUPAP give small prizes for early career scientists in each area of physics. These prizes might be medals or monetary awards. To establish such a prize, a commission would need to make a proposal to the IUPAP Executive Council for approval. The proposal would include the following items:

- Name of the prize
- Criteria for selection
- Procedure for forming the selection committee
- Size and type of prize (monetary, medal, etc.)
- Frequency (annually, every two years, etc.)
- Venue for presenting the prize

IUPAP would annually include up to 20,000 Euros in its budget to fund such prizes. In addition, a standard design for medals would be agreed upon so such medals would become easily recognizable.
